KIEPE INFORMATION & SERVICE PORTAL

- Customer portal for efficient maintenance and repair
- all information about maintenance and repair on a single platform
- online use without additional software
- shopping cart function for a simple and fast ordering process
- further functions can be integrated optionally (e. g. customer support system, KFM interface)
- adaptable to your individual requirements (e. g. SAP connection)

INCREASE THE EFFICIENCY OF YOUR MAINTENANCE AND REPAIR!

The Kiepe Information & Service Portal KISP gathers all information about maintenance and repair on a single platform.

The online portal gives you access to the interactive parts catalogue with all parts lists and drawings belonging to your product, as well as all the documentation required for the safe and efficient operation of your vehicles: e. g. maintenance and inspection schedules, maintenance instructions or circuit diagrams. Updates are always available to you on short notice.

All parts shown on the design drawings can be found quickly and easily in the parts lists via direct links. Optionally, all other information units within KISP can also be

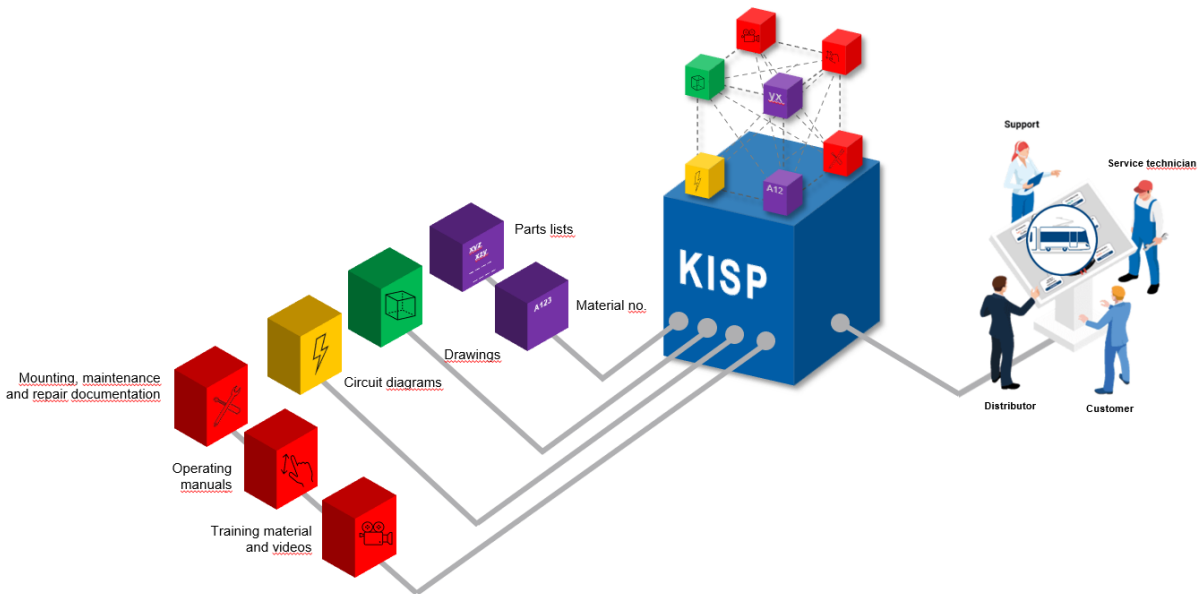

linked with one another.

These links allow for an easy and intuitive access to all necessary information for any application and facilitate the efficient planning and execution of your maintenance and repair work.

With KISP, you have access to all information anywhere at any time. Thanks to the shopping cart function, you can order spare parts directly from Kiepe Electric. Interfaces to other software such as the Kiepe Fleet Management (KFM) or our customer support system can be set up as well.

OVERVIEW KIEPE INFORMATION & SERVICE PORTAL KISP

Available information modules	Parts catalogue incl. drawings and parts lists. Circuit diagrams, maintenance documentation, shopping cart, search function, favorites, notes.
